WordPress
Adobe Programs
Dreamweaver | Photoshop
Illustrator
Microsoft Office

The challenge of problem solving and exploring new technology while incorporating design to obtain a cohesive experience for the user has been my main career focus. I have enjoyed being a part of a team of people who play off of each other's strengths and building relationships while growing within my current company position. My hope is to find another company that also creates an environment which encourages people to continually expand their knowledge and positions to grow within a company long-term.
